

March 27, 1967

Mr. Spyros Andreopoulos
Medical Center News Bureau

Joshua Lederberg
Department of Genetics

Dear Spyros:

Thank you very much for your encouraging memo of March 23. It moves me to ask whether you would care to lend your own efforts towards somewhat wider dissemination of the column, particularly in the Bay Area. The Chronicle has been rather negative, and perhaps this is just as well. But I thought that if you wished you might be able to put in a good word with the Palo Alto Times to make it easier for some of our mutual friends to see the column on a regular basis, and perhaps also with the San Jose Mercury. In any case, I do very much appreciate your kind words.

P.S. Spyros - I should have clarified that the Post is beginning to syndicate the column, and as of this date I know that it is beginning to appear in the Boston Globe, and one or two other papers.
